

Multiple Angles

Cut multiple angles in Fiber Cement Siding with Guillotine Precision and Minimal Dust!

Long-Life

Nickel plated blade design with high leverage handle requires less force to produce clean cuts with minimal air-borne dust.

Scribe desired angle on fiber cement siding plank and feed it into the guillotine blade as you cut.

The blade is anchored above the large guillotine plate to allow clearance for cutting angles in 5/16" (8 mm) fiber cement planks up to 12" (305 mm) wide.

Quickly & Cleanly Produce

3/12, 4/12, 6/12, 8/12, 10/12 or 12/12 pitch cuts and most other angles, in fiber cement siding.

Multiple Angles

Fiber Cement Angle Cutter | No. FCC7

Cut multiple angles in Fiber Cement Siding with Guillotine Precision and Minimal Dust!

Loosen knob to swing fence out of the way for angled cuts.

A 90° guillotine fence is quickly installed to the left or right of blade for cutting siding planks to length.

Quickly & Cleanly Produce

3/12, 4/12, 6/12, 8/12, 10/12 or 12/12 pitch cuts and most other angles, in fiber cement siding.

Scribe desired angle on fiber cement siding plank and feed it into the guillotine blade as you cut.

The blade is anchored above the large guillotine plate to allow clearance for cutting any angle in 5/16" (8 mm) fiber cement planks up to 12" (305 mm) wide.

Stable welded frame will survive the most rugged job-site environments.

◀ Long-life nickel plated blade design with high leverage handle requires less force to produce clean cuts and minimal air-borne dust.

Fold-out feet act as support extensions for the cutting operation and also allow guillotine to be mounted on saw horses for optional workbench-level operation.

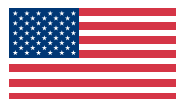

Cleanly cut any angle desired

Smooth straight cuts
