See details on back.

Malco®

SL14577

Smallest, lightest, most maneuverable impact driver on earth!

MIGHTY-RIGHT™
RIGHT ANGLE IMPACT DRIVER

- Use the Mighty-Right™ to drive or remove sheet metal screws in tight spaces and blind spots encountered when installing metal duct work, including access into small diffuse boxes and equipment enclosures.

- A unique LED light integrated into bit area sight line features a separate on / off switch.

- An external belt-clip mounted battery pack stays clear of work and won't weigh down or unbalance this one hand tool operation.

- The 5-foot (1.5 m) battery cable provides generous reach.

LED Light

No. MR1- Right Angle Impact Driver Kit

Kit includes: two belt-clip-mount, lithium battery packs; a long-reach battery cable and a 1-hour recharger in an HDPE (high density polyethylene) storage case.

Four low profile power bits are also supplied with kit: 1/4" and 5/16" Magnetic Hex bits and #1 and #2 Robertson square bits.

- Quick-connect jacks with positive locking tabs won't pull out.
